

I believe in workers control of society and industry, so I am an Anarcho-Syndicalist. Anarchist Syndicalism is revolutionary labor unionism, where direct action tactics are used to fight Capitalism and take over industry I believe that the factory committees, workers' councils and other labor organizations should be the workplaces, and should take control from the Capitalists after a direct action campaign of sabotage, strikes, sit-downs, factory occupations and other actions.

I do not believe in government, and so I am an Anarchist. I believe that government is one of the worst forms of modern oppression, is the source of war and economic oppression, and must be overthrown. Anarchism means that we will have more democracy, social equality, and economic prosperity. I oppose all forms of oppression found in modern society: patriarchy, white supremacy, Capitalism, State Communism, religious dictates, gay discrimination, etc.
